INDUSTRY OVERVIEW

Demand for energy in a fast-growing economy like India is galloping. The country is already the third largest consumer of energy in the world. India retained its spot as the third-largest consumer of oil in the world.

The gas sector is among the eight core industries in India and plays a critical role in the growth of our economy.

India's demand for gas is expected to almost double by 2030 to reach 115 BCM. By 2050, the demand for gas in the country is expected to rise to 170 BCM. The consumption of natural gas in India is forecasted to escalate at a CAGR of 12.2 percent to attain a figure of 550 MCMPD by 2030 from 174 MCMPD in 2021. According to the International Energy Agency (IEA), in India the consumption of natural gas is expected to enhance by 25 BCM, registering an average annual growth of 9 percent

until 2025. India's industrial gases market is estimated to expand rapidly in the following years till 2026.

Besides Indian government has introduced several policies to cater to increasing demand for oil and gas in India. It has allowed 100 percent foreign direct investment (FDI) in several areas of the sector, including natural gas, petroleum products and refineries, among others.

The Next Edition of the Gas India Expo 2025 is expected to facilitate to sellers to showcase and buyers to source new products, solutions and technologies, equipment's, strengthen and opportunity to build relationships with the entire energy value chain, including Natural and Industrial Gas, LNG, PNG, hydrogen, low-carbon solutions and allied industries.
