Overview

Enhancing Role of Gas in India's Energy Mix: 2030 and beyond

Venue India Expo Centre, Greater Noida, U.P. India

Duration 3 days

Frequency Annual

Next Edition 24-25-26 July 2025

In its 52nd year, and Co-Hosted by Chevron, ExxonMobil, Mexico Pacific, and Shell, Gas India Expo 2025 took place in Houston, Texas, from 17-20 September, bringing together the global energy industry to accelerate the energy transition and deliver on global net-zero ambitions.

Under the theme of 'Transforming energy through vision, innovation, and action', Gas India Expo delivered a premier platform for industry leaders, policymakers, and energy professionals to explore the pivotal role of natural gas and LNG in enhancing energy security and reducing emissions.

Over four days, Gas India Expo 2025 welcomed a record-breaking 47,876 attendees from 156 countries, to deliver unparalleled impact and shape the future of the global energy landscape.

The Gas India Expo Conferences featured 1,022 speakers - including Ministers, CEOs, policymakers, innovators, and future leaders – alongside the Gas India Expo Exhibition which showcased 768 exhibiting companies spanning the entire energy value chain, serving as America's largest showcase for cutting-edge energy products and services, and capturing the latest innovations in low carbon technology.

Gas India Expo 2025 Opening Ceremony

During the Gas India Expo 2025 Opening Ceremony, Ministers and government officials from Egypt, India, Türkiye, Nigeria, and the United States discussed the importance of mitigation and adaptation in a complex geopolitical environment. They spoke on the imperative of safeguarding entire supply chains from

shocks arising from political uncertainty. Advancing the conversation, the government leaders highlighted the key factors for accelerating the energy transition, and the critical role that policy innovations and cross-sector collaboration will play in de-risking energy supply chains and enabling a more resilient global energy future.

“

As we look forward, there are two things we need to do: We need to create the broadest partnerships around the world, and, as governments ourselves, be reliable partners and reliable suppliers to our partners.”

Shaping the Future of Energy

Following the strategic insights shared by the Ministers and government officials, Gas India Expo continued its focus on industry leadership, offering a platform for the energy industry's top executives to discuss the opportunities and challenges surrounding the energy transition.

Chevron Corporation, Chairman of the Board & CEO, Mike Wirth delivered a keynote address on the need for more inclusive conversations about the

future of energy, and the progression to be made through collaboration and consensus rather than polarisation and partisanship.

In the first Global Leadership Panel, energy leaders from Woodside Energy, Cheniere Energy, ADNOC, and JERA discussed strategies for operating in a net-zero environment. They highlighted the challenge of balancing rising global energy demand with progress toward climate goals and the need to adapt business models.

Gas India Expo 2025 Overview

Spanning more than 60,000 SQM, the 2024 Gas India Expo Exhibition featured transformative partnerships, and accelerate the next generation of energy projects that can deliver real decarbonisation progress.

768 national and international companies from across the globe, representing the entire energy ecosystem.

Exhibitors provided a showcase of the latest cutting-edge solutions, technologies and innovations that are revolutionising the future of energy. Their participation helped grow the natural gas and LNG sector, forge

Spanning five exhibition halls, Gas India Expo hosted three specialist industry areas which highlighted the pivotal role of technology in driving wide-scale decarbonisation in all parts of the energy value chain and highlighted their vital roles in a diversified energy transition.

Specialist industry areas included:

NATURAL GAS

LNG

HYDROGEN

INDUSTRIAL GASES PRODUCTION

GAS TECHNOLOGIES

GAS EQUIPMENT

ALLIED INDUSTRIES

Features included:

PROCUREMENT MEETING PLACE

HOSTED BUYER PROGRAMME

Participating Companies

150+ exhibitors participated at Gas India Expo 2025 in Houston, including international energy companies, medium-sized enterprises, and cutting-edge start-ups. Spanning five halls, the exhibition floor offered a true reflection of this ever-growing industry and played an important role in shaping the industry's low carbon future.

Leading energy companies participating at Gas India Expo included:

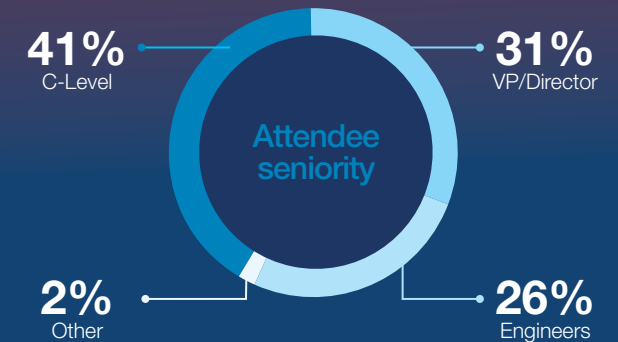

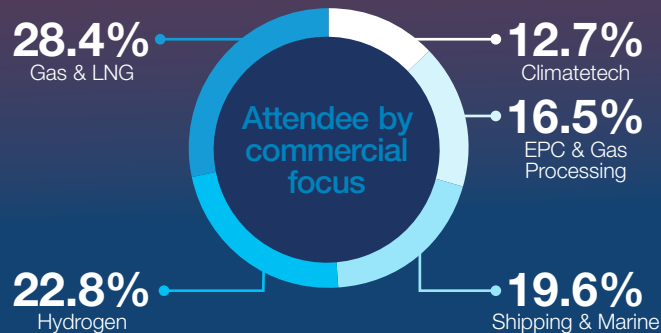

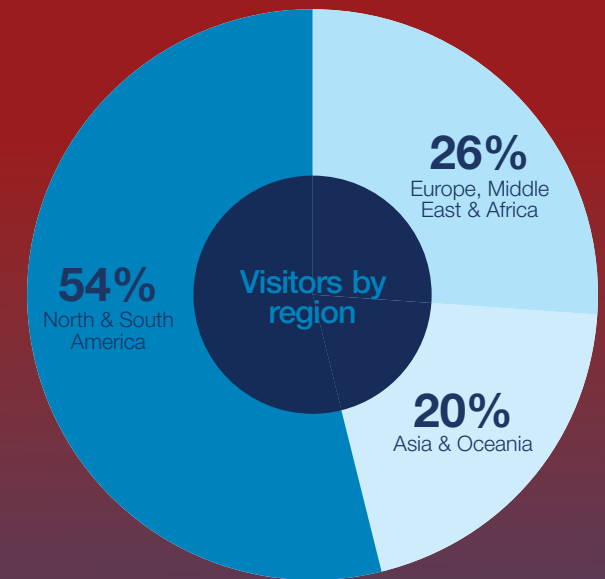

Visitor Overview

A pivotal platform convening global business leaders, policymakers, disruptors and innovators

Gas India Expo continues to deliver a visitor profile that delivers at every level of the procurement chain and attracts new audiences reflecting growth market sectors including climate technologies, AI, and hydrogen.

International representation remained strong, with a generous spread of global, regional and local visitors across the conference and exhibition.

Seniority of attendees was also positive, solidifying Gas India Expo's role in fostering collaboration, partnerships and critical conversations at every level.

Visitor feedback

91%

of visitors were satisfied with Gas India Expo this year

93%

of visitors are likely to return to Gas India Expo

96%

of visitors rated Gas India Expo as important to their organisation

Climatetech & AI: Catalysing decarbonisation with advanced climate technologies

An increasingly important area on the show floor, Gas India Expo Climatetech & AI featured 140 companies, providing attendees with a window into the future of the industry, and access to an exciting showcase of cutting-edge decarbonisation and energy transition solutions.

This area demonstrated the pivotal role of technology and AI in driving wide-scale decarbonisation in all parts of the energy value chain. In the Climatetech & AI Hub, innovative start-ups operating across the energy ecosystem showcased the next generation of climate technologies, with state-of-the-art displays, demonstrations, and technologies that are set to transform industry practices.

Gas India Expo has built a growing consensus around the transformative power of natural gas and LNG, as well as the game-changing solutions that can enable a low carbon, flexible, and affordable energy mix.

Exhibiting companies included:

Hydrogen: Accelerating hydrogen's role in the global energy mix

A significantly expanded Gas India Expo Hydrogen exhibition hosted more than 130 companies and showcased cutting-edge technologies that are pioneering a more sustainable future, while also sharing leading industry insights to help shape policy and support hydrogen development.

Driving transformational progress in the energy industry, Gas India Expo Hydrogen pioneered frameworks to elevate hydrogen's role in the global energy mix,

demand. hydrogen scale to partnerships cross-industry foster and deployment hydrogen carbon low for developments market and policy advance

Conference Overview

The Strategic and Technical & Commercial Conferences set the critical agenda for the energy industry, gathering leaders from across the entire value chain. From ministers and executives to policymakers and innovators, all shared a common goal: To reshape the future of energy through vision, innovation, and decisive action.

These conferences provided a platform to discuss the vital role of natural gas, LNG, hydrogen, climate technologies, and AI in driving energy transitions. By promoting collaboration and innovation across the energy ecosystem, experts in energy, policy, technology, and finance contributed to progress toward a stable, secure, and affordable energy future, leading to important discussions and solutions for a smooth and equitable transition.
